Finish Thompson Inc. is a designer and manufacturer of industrial pumps, solvent and engine coolant recyclers and coolant changers. FTI products are manufactured on site in Erie, Pennsylvania, U.S.A. and marketed worldwide through an international network of stocking distributors.

From its beginning in 1951 as a designer and builder of custom decorating equipment, to its current position as a leading supplier of fluid transfer pumps and recycling systems for the fluid handling and environmental markets, Finish Thompson has proven to be highly intuitive in projecting and reacting to changing market demands.

Pump Selector Applications

Finish Thompson has online selectors for both drum and centrifugal pumps. Visit www.finishthompson.com and click on the appropriate selector button.

The **centrifugal pump selector** utilizes hydraulic and other application criteria to quickly search our vast selection of centrifugal pumps to find the ones that are most appropriate.

The **drum pump selector** allows the user to select from a list of common chemicals and it makes pump tube/motor recommendations that are appropriate for that chemical.

Custom Pump Group

Finish Thompson's Custom Pump Group quotes and builds pumps with modifications to existing designs. These modifications allow customers to exactly match their requirements whether for demanding, specialized OEM applications or a single pump for an end user application. If our standard pump offering does not fill your specific requirements, our Custom Pump Group may have a solution for your pumping application. Please contact FTI with your special modification requirements.

Features

- Magnetically coupled...no seals to replace
- 5-year warranty
- Excellent for highly aggressive liquids, chemicals, acids, caustics and corrosives
- Extended run dry capability with carbon bushing
- Up to 1.8 SG
- Working pressure to 90 psi (6.2 bar)
- Viscosity up to 150 cP
- Easy set, measurement free drive
- Back pull-out design for easy service
- ATEX certified models available

Construction

- Corrosion resistant polypropylene (180°F/82°C) or PVDF (220°F/104°C).
- Rare earth neodymium magnets
- FKM or EPDM o-rings standard; other options available
- Carbon, ceramic, PTFE, silicon carbide (SiC not available on DB3, 4, 5) bushings.
- TEFC, Chem Duty, EXP and 575V NEMA or IEC motors.
- ISO 1940 G2.5 balancing (not on DB3, 4, 5)
- NPT or BSP threaded, union, or flanged connections
- NPT or BSP only on DB3, 4, 5

Applications

- Chemical processing, bulk unload, transfer
- Plating recirculation/filtration, PCB etching/rinse
- Water/waste water treatment, wet scrubber
- Laboratory, pharmaceutical, photo processing

Typical Chemicals:

- Sodium hydroxide, sodium hypochlorite
- Sulfuric acid, hydrochloric acid, nitric acid
- Corrosive blends, solvents, waste water

60 Hz, 3450 rpm

50 Hz, 2900 rpm

Features

- Magnetic drive
- Five-year warranty
- Excellent for pumping from above or below ground storage
- Provides up to 25 feet (7.6 m) of lift
- SP11/15 prime 18 feet (5.5 m) in 90 seconds**
- Retains fluid for re-priming when shut off without a check valve
- Up to 90 psi working pressure (6.2 bar)
- Runs without damage in absence of continuous flow
- Handles over 1.8 SG
- Back pull-out design for easy service

**with maximum diameter impeller

Construction

- Corrosion resistant polypropylene (180°F/82°C) or PVDF (220°F/104°C)
- Rare earth neodymium magnets
- Molded-in "gooseneck" suction passage eliminates need for internal check valves
- Easy set outer drive ensures optimum magnet alignment and easy motor installation
- FKM or EPDM o-rings standard. Other options available
- Carbon, ceramic, PTFE or silicon carbide bushings
- Mounts to NEMA or IEC motor frames
- NPT or BSP threads, flange or union connections
- Special design inner volute enables fast priming

Applications

- Bulk unload or transfer from rail cars, tanker trucks, sumps, pits, day storage or underground storage tanks to process or storage locations
- Over-the-wall applications
- Piping systems that have trapped or entrained air
- When run-dry protection is needed

Typical Chemicals

- Sodium hydroxide, sodium hypochlorite
- Sulfuric acid, hydrochloric acid, nitric acid
- Corrosive blends, waste water

Caution: The SP Series is not recommended for pumping flammables.

Features

- Magnetically coupled to motor; no mechanical seals to leak or replace
- Rare earth neodymium magnets
- MSKC Series generates increased head at low flow
- Low power consumption - Multi-Stage
- Multi-stage wide hydraulic envelope allows mix and match impeller sizes
- Interchangeable components
- VKC sealed column eliminates micro bubbles; no wetted shaft bearings
- Back pull-out design for easy service on horizontals

Construction

- Corrosion resistant polypropylene (180°F/82°C) or PVDF (220°F/104°C) horizontal; **vertical models** maximum temperature - 140°F/60°C
- Multi-stage design with small foot print
- MSKC Series - unique interconnecting drive shaft transmits torque to first stage impeller
- MSKC - independent thrust bearings at each stage for maximum reliability
- FKM or EPDM o-rings standard; carbon, ceramic or PTFE bushings
- Standard NEMA 56C or IEC motors
- VKC - modular build in 6" increments from 12" (30 cm) to 60" (152 cm)

Applications

- High pressure/low flow applications for chemical processing, spraying, bulk unload, tank transfer
- Plating recirculation/filtration, PCB etching/rinse
- Water/waste water treatment, wet scrubber
- Laboratory, pharmaceutical, photo processing

Typical Chemicals

- Sodium hydroxide, sodium hypochlorite
- Sulfuric acid, hydrochloric acid, nitric acid
- Corrosive blends, solvents, waste water

60 Hz, 3450 rpm

50 Hz, 2900 rpm

Features

- Magnetically coupled to motor; no mechanical seals to leak or replace
- Run dry ability with carbon bushing
- Superior corrosion resistance in most extreme chemical processes
- ANSI or ISO flange mounting
- Close coupled
- 1.8 SG with no impeller trim
- Engineered for long life and low maintenance
- ATEX certified models available

Construction

- Ductile iron casing lined with DuPont™ Tefzel®
- Casing meets ANSI/B73.1M nozzle loads
- High strength rare earth neodymium magnets
- Enclosed impeller is injection molded from carbon fiber reinforced ETFE for superior corrosion resistance
- Internal drive hub has ETFE encapsulated magnets for added protection
- Sintered silicon carbide or carbon bushings
- FKM, EPDM, Kalrez® Simriz® or Atlas® o-rings
- TEFC, Chem duty, EXP NEMA or IEC motors

Applications

- Manufacturing, spraying, transfer of extremely corrosive chemicals
- Recirculation/filtration, water or waste water treatment, acid recirculation
- Fume scrubbers, cleaning processes

Typical Chemicals:

- Sodium hydroxide, sodium hypochlorite
- Sulfuric acid, hydrochloric acid, nitric acid
- Corrosive blends, solvents, waste water
